

Page Cannot Be Found Error

Any alerts to connect to the Internet is simply 'MyBusiness' connecting to the server 'MyBiz' creates on your PC and not to the Internet. To prevent this from happening: Go to Internet Explorer and choose Tools, Internet options. Select Delete cookies and also delete files and off line files.

As shown below.

Stay in Internet Explorer > Tools > Internet options > Using the Connections tab at the top Select.

If you have a dial-up connection: Click on the 'Dial whenever a connection is not present' option and press ok.

If you have a broadband connection: Click on the 'Never dial a connection' option and press ok. See below
